

# Mobx 2

## 1 상태관리 라이브러리

## About Mobx

(<https://mobx.js.org/about-this-documentation.html>)

## React integration

(<https://mobx.js.org/react-integration.html>)

mobx-react-lite

## React optimization

(<https://mobx.js.org/react-optimizations.html>)

Use many components

Dereference values late

makeObservable

makeAutoObservable

(<https://mobx.js.org/observable-state.html>)

actions

(<https://mobx.js.org/actions.html>)

runInAction

flow

computed

(<https://mobx.js.org/computeds.html>)

## 정리

### Mobx 2

with React

re-render issue (small component)

makeAutoObservable

makeObservable을 보다 쉽게

actions

runInAction / flow
