

# Tailwind CSS 2

## 1 UI 라이브러리

Core concepts

(<https://tailwindcss.com/docs/utility-first>)

Message example

## Responsive Design

(<https://tailwindcss.com/docs/responsive-design>)

md:w-32 ..

Dark mode

(<https://tailwindcss.com/docs/dark-mode>)

dark:

‘media’ vs ‘class’

# Customize

(<https://tailwindcss.com/docs/configuration>)

## Display

(<https://tailwindcss.com/docs/display>)

## Position

(<https://tailwindcss.com/docs/top-right-bottom-left>)

## Border

(<https://tailwindcss.com/docs/border-color>)

## Transition

(<https://tailwindcss.com/docs/transition-property>)

## 정리

### Tailwind CSS 2

Utility First

클래스 이름 생성 X / CSS 추가 X

다크모드

대응 용이(media / class)

Customize

configuration 차원에서

대부분의 css

커버함 (but 예제는 아쉽...)
